

# MORTEN LUNDUM-NØRGAARD

I take the complex and turn it into something you can see.

m.lundum.andersen@gmail.com · mlnorgaard.com · github.com/M-LN · linkedin.com/in/morten-lundum-nørgaard

## PROFILE

I've spent 14+ years working hands-on in complex technical environments — first as an electrician, later moving into data and ML development. Alongside that, I've built frontend and visual projects on my own for years, simply because I enjoy the craft. I like working in structured teams where quality matters and decisions are made by whoever knows the subject best — and I've already proven to myself that I can **learn a new discipline properly** when I care about the direction.

## PROFESSIONAL EXPERIENCE

### Vestas — Lead Test Supervisor

2023 - present · Aarhus

- Developed ML model pipeline in Dataiku — feature engineering, evaluation and performance analysis.
- Built Python automation for data analysis and reporting.
- Implemented monitoring and observability solutions; operated and stabilized test equipment and technical platforms.
- Troubleshoot complex systems across hardware/software boundaries using logs, measurements and system behavior.
- Collaborated with developers, engineering, test teams and data scientists — including close mentoring from a senior data scientist.

### Vestas — Electrician

2011 - 2023 · Aarhus

- Troubleshooting, system stability and technical testing · quality assurance and documentation · panel building, rework and system integration.

### Intego A/S — Electrician

2010 - 2011

- Installation and service of industrial technical systems · troubleshooting and quality assurance.

## SELECTED PROJECTS - LIVE DEMOS AT MLNORGAARD.COM

- patterniseverything.com** — 249 interactive topics on ML and financial markets, built from scratch in vanilla JS, D3 and Canvas.
- Danmarks Elnet, Live** — Standalone dashboard pulling real-time data from Energi Data Service every minute — wind share, CO<sub>2</sub> and spot prices.
- Østjylland Ro-index** — Extracts incidents from public police reports via an LLM and maps a calm score per municipality; daily GitHub Action.
- AI Estimation Playground** — Dependency-free HTML labs teaching Kalman filters and Gaussian Processes through live simulation.

## CORE SKILLS

### FRONTEND & VISUAL

Vanilla JS · HTML5 · CSS3

D3 · Canvas

Typography · color · motion

UI & information architecture

### AI & MACHINE LEARNING

Dataiku ML pipelines

LLM agents · RAG · Copilot

EDA & data quality

ML · DL · GenAI · Agentic AI

### DATA ENG. & AUTOMATION

Python

Dataflows & pipelines

Azure Data Explorer (KQL)

Azure DevOps

Grafana · InfluxDB

### SYSTEM ENGINEERING

Hardware/software troubleshooting

Linux · virtualization · containers

Documentation & standards

## EDUCATION & CERTIFICATIONS

### Electrician

Installation Technology — Aarhus Technical College. Self-directed since: JavaScript/HTML/CSS, Python, ML, cloud, Linux, automation, monitoring.

### Certifications

**IBM:** Supervised ML (Classification · Regression) · Exploratory Data Analysis for ML · Machine Learning with Python · Data Analysis with Python · Python for Data Science, AI & Development

**Meta:** Programming in Python **Dataiku:** Designer

### Languages

Danish (native) · English (fluent)
